Dear Sir:

Please enter the following Preliminary Amendment before examining this application

IN THE CLAIMS

Please amend claim 11 to read as follows:

11. (Amended) In a system for providing secure remote access between a plurality of unrelated host computer networks and a plurality of authorized users via a network access server, a method of monitoring access to each of the unrelated host computer networks comprising the steps of:

- maintaining a list of host computer networks and an associated list of authorized users for each host computer network in a first memory device;
- automatically creating a starting time stamp at the beginning of a remote access call received from an authorized user at a communication server and connecting the authorized user to an appropriate one of the plurality of unrelated host computer networks
